Arkadia Digital Advisory SAGL becomes ARKADIA DIGITAL SA: a new phase of growth and consolidation.

Arkadia Digital Advisory officially announces its transformation into ARKADIA DIGITAL SA, which took place on October 15, 2025, marking a milestone in the company's growth and maturation.

The transition from SAGL (limited liability company) to SA (public limited company) represents not only a legal evolution, but above all a qualitative leap in the structure and institutional solidity of Arkadia, which has been operating for over four years in the field of consulting and advisory services in digital assets and emerging financial technologies.

"This change is not only formal, but substantial," comments Arkadia's management. "Becoming an SA means equipping ourselves with more structured governance, more appropriate tools for growth, and even greater transparency towards partners and customers".

The completion of the process, made possible thanks to the joint commitment of the team and the support of partners close to the company, opens a new phase characterized by greater solidity, more confidence, and new prospects for development in the Swiss and international digital finance landscape.

"The journey has inevitably been a long one," he continues, "but it is precisely thanks to perseverance, mutual trust, and a shared vision that we can now look ahead with even greater determination. Sincere thanks go to the entire Arkadia team and to those who have accompanied us on this journey."

With its transformation into ARKADIA DIGITAL SA, the company consolidates its position as a point of reference in the dialogue between traditional finance and digital innovation, strengthening its foundations to face the challenges ahead with an even more institutional approach.
